“Membership is the real strength of the Association”

“contact us or use the MEAssist system”

Our Association networks relationships and transactions between Members at no charge.

When the Association promote transactions between Members and Associate Members a standard charge or referral fee applies. This is invoiced to the Associate Member providing the service. These fees vary between Associates and reflect a wide variety of pricing models. The fee is constructed to be less than the usual marketing overhead recovery component of an Associate’s pricing that enables a saving for Associates while using competitive market pricing which benefits all those involved.
